SUMMARY

Product-oriented Full Stack Developer with 6+ years of experience delivering enterprise applications across automotive and logistics domains. Experienced in stakeholder collaboration, workflow optimization, Agile delivery, and requirement-driven feature implementation across nationwide systems. Skilled in user research, product discovery, PRD creation, cross-functional collaboration, and API-driven platform development with hands-on exposure to AI-powered product case studies and feature prioritization frameworks.

WORK EXPERIENCE

Infosys Ltd. | Client: Honda Cars India

Noida

Technology Analyst

Feb'22- Present

- Reduced manual allocation effort by **~70%** for the sales planning team by transitioning from manual allocation processes to system-generated allocation, reducing activity turnaround time from 2–3 hours to ~10 minutes.
- Improved operational stability of Honda's Dealer Management System by reducing recurring production incidents from **450 to 60** through root cause analysis, debugging, and implementation of permanent fixes across critical workflows.
- Collaborated with **business stakeholders from Japan** and on-site operations teams during requirement discussions, sprint planning, and UAT coordination to deliver new functionalities, streamline daily operations, and support achievement of monthly and year-end vehicle delivery targets.
- Maintained **zero SLA breaches** throughout tenure by ensuring the timely resolution of critical production and operational issues.
- Enhanced Honda's nationwide Dealer Management System used by **400+ dealerships** by streamlining vehicle allocation, dealer ordering, and dispatch workflows to improve operational efficiency.
- Received client recognition and on-site appreciation awards for operational ownership, production stability improvements, and supporting business-critical delivery workflows.

Amazin Automation Solutions

Gurugram

Java Developer

Aug'19-Dec'21

- Developed **logistics platform workflows** supporting vehicle tracking, operational monitoring, and transportation management activities.
- Collaborated with internal teams to deliver feature enhancements and improve operational usability across logistics workflows supporting transportation management activities.
- Implemented system integrations to improve operational data flow and support reliable logistics tracking workflows.
- Supported deployment and maintenance activities on **AWS**, ensuring stable application performance and smooth release execution.
- Supported cross-functional business initiatives by designing footwear mockups for **Action Shoes** and creating digital marketing creatives during the COVID period to support promotional and customer outreach activities.

GetMyUni

Bangalore

SEO & Content Intern

Jan'19-Jun'19

- Optimized website pages using on-page **SEO practices** and **keyword optimization** techniques to improve content discoverability and user readability.
- Supported website **content optimization** by monitoring page performance and applying basic SEO practices.

PROJECTS

Google Photos — Product Improvement Case Study

- Designed smart filtering concepts aimed at **reducing photo retrieval effort** and **excessive scrolling** behavior for information-seeking users.
- Conducted **product discovery** through user interviews and surveys to identify pain points in photo retrieval, user behavior patterns, and **engagement friction** within Google Photos.
- Performed **competitor analysis** across Apple Photos, Amazon Photos, and gallery applications to evaluate content organization and retrieval experiences.
- Prioritized **MVP solutions** using the **ICE framework** and proposed Smart Content Filters, Visual Tags, and Retrieval History features to improve **user engagement** and reduce retrieval effort.
- Developed end-to-end **product requirements documentation**, including user stories, success metrics, acceptance criteria, user journeys, and prototype flows to validate proposed product improvements.

Nykaa — AI Beauty Look Generator

- Conceptualized an AI-powered beauty discovery experience aimed at improving **purchase confidence**, reducing **cart abandonment**, and increasing **conversion** through personalized beauty recommendations.
- Identified key user pain points, including shade uncertainty, decision fatigue, low purchase confidence, and cart abandonment in online beauty shopping journeys.
- Defined user personas, business goals, **engagement metrics**, and AI-assisted recommendation flows to support **product strategy** and improve customer decision-making experiences.
- Developed end-to-end **PRD** covering customer journey, contextual recommendations, commerce integration, edge cases, and guardrail metrics for AI-driven beauty commerce experiences.

EDUCATION & Certification

PES Institute of Technology <i>B.Tech - Computer Science & Engineering</i>	Bangalore <i>(2015-2019)</i>
HelloPM <i>Certification in AI Product Management</i>	Online Course <i>(Mar’26)</i>

SKILLS & INTERESTS

Tools: Jira, Figma, SQL, Excel, Canva, CorelDRAW, Power BI, Tableau, Google Analytics, Git, AWS

Product: User Research, Product Discovery, Requirement Gathering, Stakeholder Management, Sprint Planning, Feature Prioritization, Competitor Analysis, Product Ideation, Wireframing, UI/UX Design, Agile Methodologies, User Segmentation

Technical Skills: Java, Spring Boot, REST APIs, React, System Integrations, Production Support, IBM DB2, MySQL

Interests: Product Strategy, AI Tools & Automation, Automotive Technology, Design & Prototyping.
